Aluminum- One of the most plentiful and versatile metals on the planet, aluminum can be treated in a variety of ways, from extruded to spinning. Exceptionally easy to work, it can be stretched, welded or even glued. It also offers many ways of applying surface color, such as anodizing or powder coating. An extruded aluminum pendant for direct and directional illumination. Powder coated exterior with anodized interior. Shade can be rotated upon installation to provide directional light. Choose from black with yellow interior or white with pink interior.
